

Utopian Wireless Corporation Joins Competitive Carriers Association

April 7, 2014, Washington, DC – Utopian Wireless Corporation (Utopian), an emerging 4G wireless broadband company and holder of 2.5 GHz spectrum, has joined the Competitive Carriers Association (CCA) as a carrier member. Established in 2006, Utopian is an aggregator of 2.5 GHz spectrum for deployment of wireless broadband networks in partnership with existing broadband service providers. Utopian currently holds licenses and leases for 2.5 GHz spectrum covering 25 markets in 17 states. Utopian plans to leverage its experience, comprehensive database of 2.5 GHz spectrum (both licensed and yet to be licensed), and proprietary 2.5 GHz mapping software, to support CCA members in their development and deployment of 2.5 GHz networks.

“Our membership with CCA will provide CCA members an opportunity to secure spectrum to deploy wireless broadband networks” said Utopian’s Founder and CEO, Rudy Geist. “Utopian has the tools to quickly identify and analyze any available 2.5 GHz spectrum acquisition opportunities throughout the country.”

CCA President & CEO Steven Berry said, "We are delighted Utopian has joined CCA as a new carrier member. Working together we can enhance our presence in the policy arena and find business solutions for our carrier members. Utopian’s work in the 2.5 GHz spectrum band provides a unique opportunity for fellow CCA members, and I look forward to working together in the year ahead.”

About Utopian Wireless Corporation

Founded in 2006, Utopian was created upon the premise that rural communities, like their urban counterparts, should have access to wireless broadband services. Utopian Wireless focuses on building wireless networks in third tier and smaller markets where consumers are currently underserved by broadband service providers. Utopian is a holder of licensed 2.5 GHz spectrum rights in 17 states. For more information about Utopian, please visit our website at www.utopianwireless.com
